# 5 Coffee Beans

## THAT OUR LOCALS ARE LOVING

### 1. Robusta

Robusta Coffee is coffee made from the beans of the *Coffea canephora* plant, the origins of which are in Africa. Robusta coffee is notoriously bitter and is used primarily in instant coffee, espresso, and as a filler in certain blends of ground coffee.

### 2. Arabica

*Coffea arabica*, also known as the Arabica coffee, is a species of flowering plant in the coffee and madder family Rubiaceae. It is believed to be the first species of coffee to have been cultivated and is currently the dominant cultivar.

### 3. Liberica

*Coffea liberica*, commonly known as the Liberian coffee, is a species of

flowering plant in the family Rubiaceae from which coffee is produced. It is native to western and central Africa,

## 4. Typica

**Typica** (also Tipica) is the forefather of coffees. It has spread around the world and it has adapted to local climates, creating many different variations

## 5. Excelsa

**Excelsa** coffee beans are known for their incredibly complex flavor profile and are commonly used in coffee blends for added dimension.
